9/8/10	03:58 PM	Flash Fundamentals	David Casuto	A comparison cheat sheet would help: when to use motion vs classic tween, object vs merge shapes. The vocabulary is new and it's not intuitive.	I liked the small class size (only 3 of us). Dave was open about receiving questions from us. Maybe there could be a segregated class for print designers; we think differently and it might be helpful to have an instructor who "spoke" print and was able to make analogies from that	just right	8	8

9/8/10	03:58 PM	Flash Fundamentals	David Casuto	A LOT of material covered in this two day course--would have liked a bit more "refresher" from Day 1 to Day 2. It was a bit overwhelming	The course was a really good foundation training for Flash. Also the small class size really facilitated being able to learn at our own pace. We had quite a lot of opportunity for hands-on training from the instructor and he was very clear and thorough.	too fast	10	10

9/2/10	02:59 PM	Word 2007 Intermediate	David Casuto	Just keep hiring David.	David is a very good teacher. I think he would even be able to teach thermodynamics to a group of senior citizen monkeys. He's very good at explaining complicated concepts in simple terms that even child may understand it.	just right	10	10

8/25/10	03:41 PM	Excel 2007 Intro	David Casuto	I'm not sure how to improve it but it seemed that the range of experience was really wide.	It was very straight forward and had a lot of techniques that I was interested in learning about and using.	just right	9	10
8/25/10	03:40 PM	Excel 2007 Intro	David Casuto	David did a great job, I can't think of anything to do differently.	Overall it was well taught and I learned a lot of the basic functions of Excel. If I could do this over again I would probably take an Intermediate class instead of Intro but I still learned tricks that will make my work in Excel more efficient.	just right	10	10

8/25/10	03:16 PM	Excel 2007 Intro	David Casuto		Mr. Casuto is a wonderful teacher. He is funny and has an ability to clearly and eloquently explain abstract/complicated concepts. He's very smart, clever and articulate. He is patient as well. I thought this class was going to be torture (and boring) but it turned out to be fun, interesting & informative.	just right	10	10
8/24/10	03:51 PM	Outlook 2007 Intermediate	David Casuto	Teachers keeping more to the text in the book, rather than going off on their own w/shortcuts and long explanations of how they do things. Also, allowing students to do practice	Well organized, allows us to do practice work out of book on what we're learning - no other teacher has done that here on any of the classes I've taken. Dave covers all the material, which is great.	just right	10	10

8/24/10	03:50 PM	Outlook 2007 Intermediate	David Casuto	The setup was faulty- several of the labs did not work correctly because of missing files and disconnections from exchange. the instructor was able to bounce back but it was irritating to not be able to complete the coursework because of computer issues in a computer training course.	good but it was review. I had thought it would be more detailed or more into "best practices." It was completely fine but I would appreciate a more advanced course being taught as well.	too slow	8	8
